

MEVLÜT TUNAHAN DEMİR

JUNIOR ARCHITECT

EDUCATION

2-Year Intensive English Preparatory Program

2017-2019

Final International University - North Cyprus

"Since my university offered 100% English-medium education, I decided to build a strong foundation by completing a 2-year intensive English preparatory program. Although I started with no prior background, I successfully brought my language skills to a professional level, allowing me to fully comprehend and implement complex academic and architectural terms. In October 2024, I received my IELTS General certificate, and you can view it."

Bachelor of Architecture — 100% Scholarship (English)

2019-2023

Final International University - North Cyprus

Completed a rigorous, fully English-taught architectural curriculum with a 100% merit scholarship. Developed a strong foundation in architectural design, conceptual thinking, and digital visualization tools through highly collaborative studio environments. Actively engaged in student architecture societies and workshops, balancing academic excellence with a passionate, creative, and dynamic approach to design challenges.

WORK EXPERIENCE

Office Intern (1 Month)

01.08.2022

Archklass Architecture & Engineering

- Collaborated with an interior designer to develop and produce high-quality architectural renders using 3ds Max.
- Assisted in the space planning and 2D layout design for a private residential country house project based on client requirements.
- Transformed 2D architectural concepts into detailed 3D models using SketchUp to present to the client.

Military Architect (Second Lieutenant)

2025-2026

Turkish Land Forces - Combat Engineering Corps

- Site Inspection & Surveying:** Visited military buildings to check their conditions, took precise on-site measurements, and prepared measured drawings (survey/rölöve) and basic architectural sketches.
- Tender Preparation & EKAP Management:** Prepared technical specifications, quantity surveys, and estimated costs according to public procurement laws. Published tender documents on EKAP (Electronic Public Procurement Platform) and managed the legal process.
- Site Supervision & Progress Payments:** Supervised the renovation works on-site to ensure they matched the technical project. Tracked construction steps and prepared interim progress payment reports for the contractor companies.

PROFILE

"I do architecture not just as a job, but because I truly love and enjoy creating spaces. I am a hands-on architect who values both the office and the field; I am always ready to help a craftsman on-site or improve my digital drawing skills with new technologies. For me, the most important things in a project are paying attention to fine craftsmanship, working patiently on details, and above all, strictly respecting safety rules. I am eager to bring this passion and hard-working attitude to a creative team."

SKILLS

- AutoCAD
- SketchUp
- Autodesk Revit
- 3ds Max
- Lumion
- AI-Assisted Rendering
- Adobe Photoshop
- MS Excel
- Architectural Model Making
- Freehand Sketching & Technical Drawing
- Handicrafts & Resin Art
- Material Coloring & Painting
